

TELL US WHAT YOU NEED TO KNOW ABOUT AUTISM WORK WITH KIDS?

If you're a medical, allied health, or early childhood professional working with pre-school aged children, we want to understand your autism training needs.

Researchers at La Trobe University are designing tailored autism training for professionals around the content of our early autism detection app, ASDetect.

You'll be asked to complete a 20-minute online survey. You can also opt in to a 20-minute online interview.

See <https://is.gd/ASDetectPRO> to participate
